

IF NOT THEN

BRAND GUIDELINES

The INNTW design system as it ships. Every value on these pages was read out of the code, and where an older reference disagrees, the code wins and the page says so.

System

@inntw/brand 1.5.0

Source of truth

`inntw-brand-kit/src/tokens.css`

The mark

`inntw-brand-kit/assets/inntw-mark*.svg`

Owner

If Not Now Then When Inc., Toronto

1 The mark

The mark is drawn, not set. Eleven brush-drawn letterforms carry all sixteen letters of the phrase. Six are read once. Five are read twice: the N and O of the first row, and the H, E and N of the second. The two shared columns hold a T over a W, which is how one drawing reads as *if not / then* and *if now / when* at the same time.

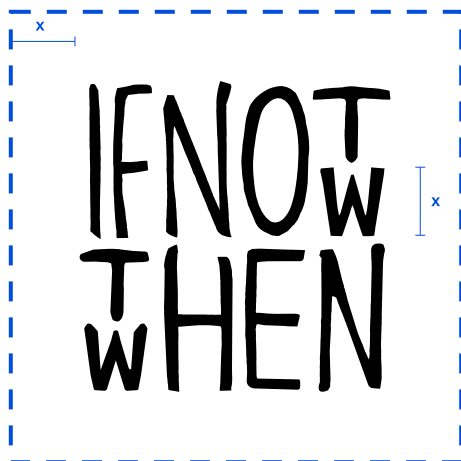

It ships as one compound path with thirteen subpaths on a square 652.73 grid, generated from the Illustrator master in `INNTW Branding/Logos/Official Logo/`. The five colourway files and the React `<Mark>` component all use that same geometry.

The hourglass drawing exists only as PNGs in `INNTW Branding/Logos/Hourglass Logo/`. It is not in the kit and has no usage rules yet.

1.1 Construction

Property	Value	Why
Artwork	One compound path, <code>fill-rule="evenodd"</code>	Keeps the counter of the O and the crossbar gaps open.
Grid	<code>viewBox="0 0 652.73 652.73"</code> , square	Scale it proportionally or not at all. Width plus <code>aspect-ratio: 1 / 1</code> means no layout shift.
Fill	One flat colour. <code>currentColor</code> in the component	Never a gradient, never two colours, never a knockout of something else.
Words	Five: IF, NOT, NOW, THEN, WHEN	When it is split into parts, it splits by word. Never into IF NOT or IF NOW.
Accessible name	<code>INNTW – If Not Now Then When</code>	Pass <code>decorative</code> when the text next to it already names the brand.
Letterforms	Brush-drawn, irregular	Do not redraw, smooth or retrace it. Never set the phrase in a typeface and call it the mark.

1.2 Clear space

Give it a fifth of itself. The clear-space unit x is the height of the W inside either shared column, one fifth of the mark's height. Keep x empty on all four sides: no type, no rule, no image edge, no other logo.

Because x is measured from the artwork, it scales with the mark. Never express it in pixels.

At least once in any layout, the mark should sit alone and large.

x is the height of the W in the shared column:
138 units on the 652.73 grid.

1.3 Minimum size

The thin points of the brush strokes go first. Under 32 px the W in the shared column fills in and the mark reads as a black square with texture.

A small version of the 'IF NOT THEN' logo, rendered in a solid black color.

32 px

Digital minimum

A medium version of the 'IF NOT THEN' logo, rendered in a solid black color.

48 px

Comfortable on screen

A large version of the 'IF NOT THEN' logo, rendered in a solid black color.

96 px

Where the hand reads

In print, hold the mark at 10 mm or wider. Embroidery and debossing need 20 mm and a simplified stitch file rather than this vector.

1.4 Colourways

Five, and no sixth. One flat colour on one flat ground.

Black on paper

#000000

#fafaf8

The default. Paper-world sites, print, the press pack.

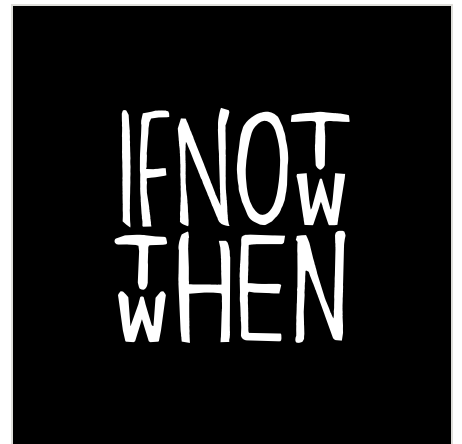

White on cobalt

#ffffff

#024fda

The cobalt world.

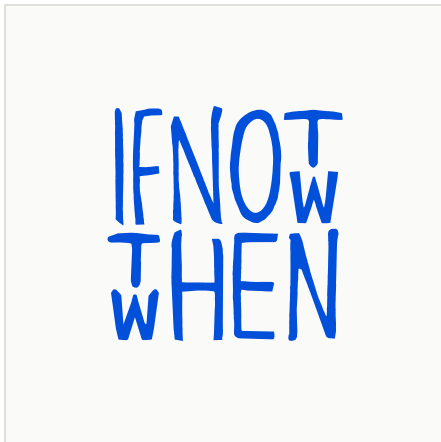

White on black

#ffffff

#000000

The footer masthead on every property. Photography.

Cobalt on paper

#024fda

#fafaf8

Paper or white grounds only. The sky world's share card.

Accent brown on cream

#85431e

#dad3c8

On cream only.

1.5 Misuse

Each plate is the real mark with exactly one rule broken.

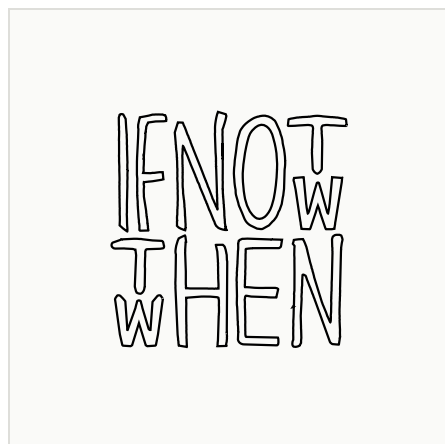

✗ Stretched

The artwork is square.

✗ Rotated

It reads top to bottom in two rows. Tilted, it reads as neither.

✗ Outlined

The weight of the stroke is the drawing.

✗ On pattern

The counters fill with whatever is behind them.

✗ Tinted back

Below full strength the thin points vanish first.

✗ In a box

No keyline, no container, no badge.

2 Colour

Twenty values ship in `tokens.css`. Eight come from the 2026 guidelines PDF; the rest are neutrals and derivatives the worlds need. Each swatch says what the colour actually does in the code today. Click any value to copy it.

What the PDF says, and what ships

The PDF ranks white, main brown, accent brown and green as primary. On the websites, the working palette is black, paper, cobalt and cream. **Main brown** appears only in the Shopify store, where it sets headings and primary buttons. **Accent brown** appears only as the brown mark colourway. **Green** and **Shine** are defined and exposed as Tailwind utilities, and used nowhere.

The paper ground is `#fafaf8`, not the PDF's white. White is the ground only in the sky world.

The build brief asked for muted `#767674`. On paper that is 4.36:1, under the 4.5:1 that WCAG AA needs for 14 px captions. It ships as `#6e6e6c`, 4.89:1.

2.1 From the guidelines

Black

`#000000` --brand-black

The mark and display type in the paper world. The paper CTA fill. The footer ground.

CMYK 100 100 100 100

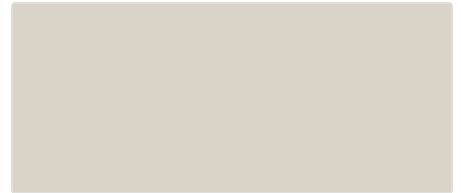

Cobalt

Pantone 293 C

`#024fda` --brand-cobalt

The cobalt world's ground. The sky world's CTA. The focus ring in the paper world. A mark colourway.

CMYK 100 63 0 35

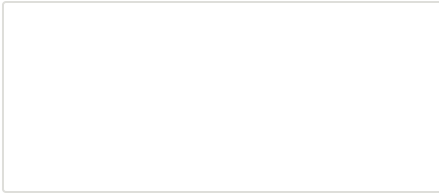

Cream

white-brown

`#dad3c8` --brand-white-brown

The CTA on cobalt. Body text on the black footer. Borders and hover in the store. Ground of the brown colourway.

CMYK 13.57 13.1 18.79 0

White

#ffffff --brand-white

The sky world's ground. The mark and type on cobalt and on black.

CMYK 0 0 0 0

Main brown

Pantone 4695 C

#5b3427 --brand-main-brown

Store only: headings, primary buttons, the selected variant.

CMYK 0 43 57 64

Accent brown

Pantone 7517 C

#85431e --brand-accent-brown

The brown mark colourway, on cream. Nothing else.

CMYK 0 50 77 48

Green

Pantone 3500 C

#006c3f --brand-green

Unused Defined, bridged to Tailwind as green . No surface uses it.

CMYK 85 26 83 7

Shine

Pantone 137 C

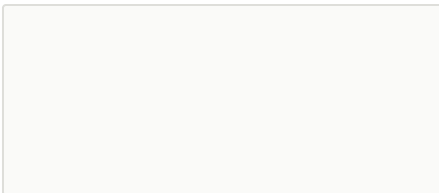

#ffa300 --brand-shine

Unused Defined, bridged to Tailwind as shine . 1.92:1 on paper, so never text.

CMYK 0 36 100 0

Pantone references are in the code. CMYK values are from the PDF only and have not been proofed.

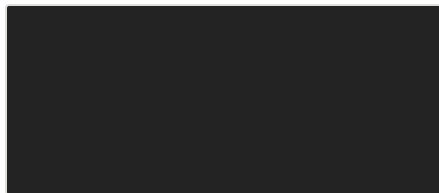

2.2 Paper neutrals

Paper

#fafaf8 --brand-paper

The ground of Origin, Lockup, Studios and the magazine.

Body

#232323 --brand-body

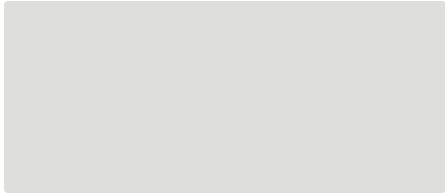

Running text. 15.04:1 on paper.

Muted

#6e6e6c --brand-muted

Captions, meta, the rail labels. 4.89:1 on paper.

Rule

#dededa

--brand-rule

Hairlines, field borders, quiet button borders.

2.3 Derivatives

These exist so a world can hold together. Use them through the semantic layer, never directly.

Name	Value	Variable	Role
Cobalt mid	#034bd0	--brand-cobalt-mid	The 55% stop of the cobalt canvas
Cobalt deep	#023fb4	--brand-cobalt-deep	The foot of the cobalt canvas. CTA hover in the sky world
Cream 200	#c9c0b2	--brand-cream-200	Cream CTA hover on cobalt
Cream 50	#f4f0ea	--brand-cream-50	Defined for cream focus/active. Used nowhere
Ink 900	#0a0a0a	--brand-ink-900	Text on cream. Display type in the sky world. Footer ground on cobalt and sky
On-cobalt body	#e8eaf2	--brand-on-cobalt-body	Running text on cobalt
On-cobalt muted	#cbd5f0	--brand-on-cobalt-muted	Meta on cobalt
Sky body	#2b3040	--fg-body in .world-sky	Running text in the sky world
Sky muted	#5b6276	--fg-muted in .world-sky	Meta in the sky world
Inverse muted	#a8a49c	--inverse-muted	The footer's quiet text and current-page item

2.4 Proportion

The paper world is two colours: paper and black, with body grey for running text. The only other colour that appears is the cobalt focus ring, and only on keyboard focus. Origin goes further and allows no second colour at all.

The cobalt world is cobalt end to end, with white and cream type and a cream CTA. The sky world is white with cobalt light at the foot of the page and a cobalt CTA. A colour the world does not name does not appear in it.

2.5 Contrast

Computed here with the WCAG 2 formula.

Text	On	Ratio	Use
Black #000000	Paper #fafaf8	20.09	Display, the mark
Body #232323	Paper #fafaf8	15.04	Running text
Muted #6e6e6c	Paper #fafaf8	4.89	Captions at 14 px. Passes AA
Cobalt #024fda	Paper #fafaf8	6.41	The cobalt mark colourway, the focus ring
White #ffffff	Cobalt #024fda	6.70	Display on cobalt
On-cobalt body #e8eaf2	Cobalt #024fda	5.58	Running text on cobalt
On-cobalt muted #cbd5f0	Cobalt #024fda	4.57	Meta on cobalt. Just passes; do not lighten the ground under it
Ink 900 #0a0a0a	Cream #dad3c8	13.32	The cream CTA label
Sky muted #5b6276	White #ffffff	6.08	Meta in the sky world
Cream #dad3c8	Black #000000	14.13	Footer body
Inverse muted #a8a49c	Black #000000	8.46	Footer meta. The code comment says 6.9:1; the true figure is higher
White #ffffff	Main brown #5b3427	10.69	Store primary button
Accent brown #85431e	Cream #dad3c8	5.01	The brown colourway
Shine #ffa300	Paper #fafaf8	1.92	Fails. Never text, never a hairline
Muted #767674 (rejected)	Paper #fafaf8	4.36	Fails AA at caption size. Why muted is #6e6e6c

Do

- ✓ Read colour through the semantic layer: `--ground` , `--fg` , `--fg-body` , `--fg-muted` , `--rule` , `--accent` .
- ✓ Keep the paper world to paper and black.
- ✓ Use cream as the one CTA on cobalt.

Never

- ✗ Write `var(--brand-*)` inside a component. That is what breaks it when the world switches.
- ✗ Set text in Shine.
- ✗ Put green or Shine on a site without a decision in canon first.
- ✗ Go back to `#767674` .

3 Three worlds

Every property renders in one of three worlds. They share one component set and one semantic layer, and switching is one class, on `<html>` or on a wrapper. The paper world has no gradients and no shadows. The other two are defined by their light.

Paper, the default

This version of you is temporary.

Origin, Lockup, Studios and the magazine. The mark is the only expressive element.

Join the list

Read more

Cobalt, `.world-cobalt`

You said you would.

The invite treatment. Helvetica Neue, cream CTA, white light on cobalt.

Join the list

Sky, `.world-sky`

Become the person you said you would be.

Somewhere back there, you said it out loud.

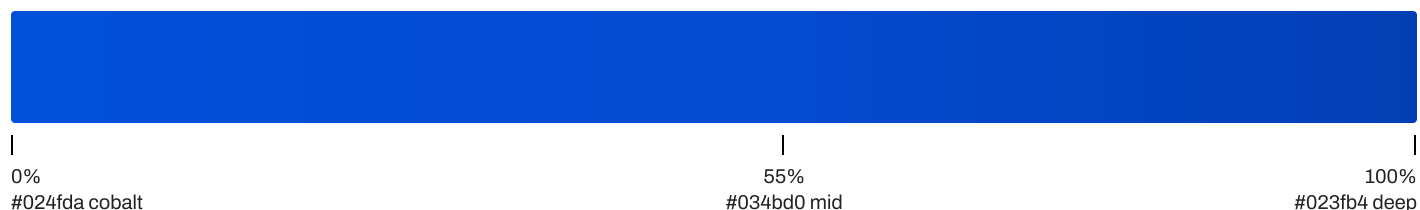

Join the list

Read more

World	Class	Properties	Ground	Display	CTA
Paper	none (default)	Origin and /press, Lockup, Studios, the magazine	#fafaf8, flat	Archivo, black	Black, paper label
Cobalt	.world-cobalt	The invite treatment	Cobalt canvas with white glow	Helvetica Neue 800, white	Cream, ink label
Sky	.world-sky	inntw.now, the Project	White with cobalt light from below	Helvetica Neue 700, ink	Cobalt, white label

3.1 The cobalt canvas

One linear gradient, top to bottom, with two faint white glows over it. The demo bar below runs at 90deg so the stops line up with the ruler; the token runs at 180deg.

Why 55%. The upper half of the page, where the headline sits, stays within a hair of Pantone 293 C. The deepening is held back to the lower half, so the page darkens toward its foot without the brand colour ever reading as a different blue behind the type.

```

--canvas:
  radial-gradient(circle at 88% 70%, rgba(255, 255, 255, 0.1), transparent 55%),
  radial-gradient(circle at 8% 18%, rgba(255, 255, 255, 0.06), transparent 55%),
  linear-gradient(
    180deg,
    var(--brand-cobalt) 0%,
    var(--brand-cobalt-mid) 55%,
    var(--brand-cobalt-deep) 100%
  );
--sky-opacity: 0.55;

```

3.2 The sky world's light

The inverse of cobalt: cobalt light on white. The main ellipse is centred at 118%, below the bottom edge, so the light rises into the page from somewhere off it. A second, much fainter wash sits top right.

```
--canvas:
  radial-gradient(
    ellipse 120% 60% at 50% 118%,
    rgba(2, 79, 218, 0.3),
    transparent 62%
  ),
  radial-gradient(
    ellipse 70% 40% at 78% 8%,
    rgba(2, 79, 218, 0.07),
    transparent 70%
  ),
  var(--brand-white);
--sky-opacity: 1;
--sky-blend: normal;
--glow: rgba(2, 79, 218, 0.55); /* the typing light */
```

3.3 Derived recipes

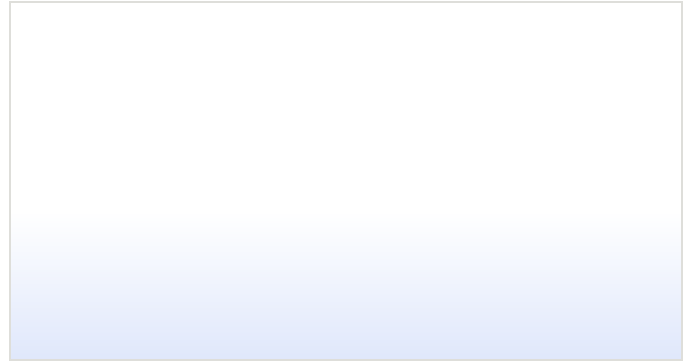

The sky layer

A `.sky` child of `.canvas`. Three white ellipses on the right edge. Screen blend on cobalt; inert on paper because `--sky-opacity` is 0.

```
.canvas > .sky {
  position: absolute; inset: 0; pointer-events: none;
  opacity: var(--sky-opacity);
  mix-blend-mode: var(--sky-blend, screen);
  background:
    radial-gradient(ellipse 800px 360px at 100% 50%,
      rgba(255, 255, 255, 0.18), transparent 70%),
    radial-gradient(ellipse 500px 240px at 92% 38%,
      rgba(255, 255, 255, 0.1), transparent 70%),
    radial-gradient(ellipse 600px 220px at 85% 78%,
      rgba(255, 255, 255, 0.07), transparent 70%);
}
```

Do

- ✓ Switch worlds with one class. Nothing else changes.
- ✓ Keep the light at the edges. Type sits on the flat part.
- ✓ Scope a world to a wrapper when only part of a page needs it.

The sky share card

The sky world's Open Graph card in `og.tsx` carries the rising light as a linear fade that holds white to 58%, with the cobalt mark on top.

```
background: linear-gradient(
  180deg, #ffffff 0%, #ffffff 58%, #dfe7fb 100%
);
```

Never

- ✗ Put a gradient or a shadow in the paper world.
- ✗ Put a gradient on the mark or on type.
- ✗ Move the cobalt stops. 0 / 55 / 100 is the canvas.
- ✗ Mix worlds inside one component.

4 Type

The PDF names four faces. None of the code uses three of them.

The 2026 guidelines PDF sets headers in Helvetica Neue, Bugaki and Aileron and paragraphs in Calps. The shipped system sets the paper world in **Archivo** and **Newsreader**, and uses **Helvetica Neue** only in the cobalt and sky worlds. Bugaki, Aileron and Calps are not referenced in any INNTW repo and no font file for them exists. The store theme uses Shopify's generic sans. If any of the three is meant to come back, that is a decision for canon first.

Aa

Archivo

Display and UI, paper world. Variable, with a width axis in use. SIL Open Font License.

Aa

Newsreader

Long-form reading in every world, and the sky world's italic confiding line. SIL Open Font License.

Aa

Helvetica Neue

Display and UI, cobalt and sky worlds. A system face, never bundled. Falls back through Helvetica, Arial and Liberation Sans, which are metric compatible.

Slot	Paper	Cobalt	Sky
<code>--font-display</code> , <code>--font-ui</code>	Archivo	Helvetica Neue	Helvetica Neue
<code>--font-read</code>	Newsreader	Newsreader	Newsreader
<code>--font-script</code>	none	none	Newsreader Italic

Archivo and Newsreader load through `next/font/google` and are self-hosted at build. The kit carries `archivo-400.woff` and `archivo-600.woff` and a base64 copy in `og-fonts.ts` for Open Graph images only. Helvetica Neue is a commercial face: anyone setting print or design files in it needs a licensed copy.

4.1 Archivo's width axis

Every paper-world app loads Archivo with `axes: ["width"]`. Drop that option and nothing errors; condensed type silently renders at normal width. 62 is the floor. Below it the counters close and the type stops agreeing with the mark's letterforms.

```
const archivo = Archivo({ subsets: ["latin"], variable: "--font-archivo", display: "swap", axes: ["width"] });
```

width 62

IF NOT NOW THEN WHEN

width 68

SECTION TITLE

width 72

PULL QUOTE

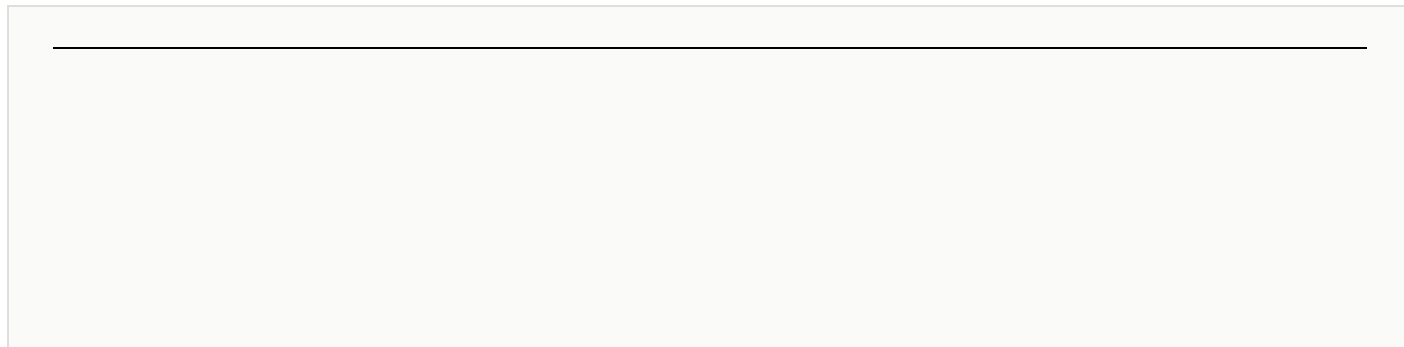

width 78

KICKER AND SUB-HEAD

62 is for nameplates and big numerals that fill a measure; 68 for section titles; 72 for pull quotes; 78 for sub-heads, kickers and drop caps. Set in Origin's `app/paper.css`.

4.2 The scale

The shared primitives, rendered live in the paper world. They set family, size, weight and tracking; colour comes from the semantic layer. Long-form text caps at `--measure: 68ch`.

.t-display

clamp(2.5rem, 1.8rem + 3.5vw, 5rem)

700, -0.03em, lh 0.94

This version of you is temporary.

.t-h2

clamp(1.75rem, 1.4rem + 1.5vw, 2.625rem)

600, -0.02em, lh 1.06

You said you would.

.t-h3

clamp(1.125rem, 1.05rem + 0.36vw, 1.3125rem)

600, -0.012em, lh 1.2

One person who will know if you didn't.

.t-lead

clamp(1.125rem, 1.03rem + 0.46vw, 1.375rem)

400, -0.01em, lh 1.5, 46ch

A dream you keep postponing because comfort is easier than
change.

.t-body

clamp(1rem, 0.96rem + 0.2vw, 1.0625rem)

400, lh 1.62

Month three has no launch, no breakthrough and no photograph worth taking. It is also
where the project is actually decided.

.t-read

clamp(1.125rem, 1.05rem + 0.36vw, 1.3125rem)

Newsreader 400, lh 1.72

As you get older, that calling to become who you're meant to be becomes quieter.

.t-meta

0.875rem

500, tracking 0

Captions and meta. Sentence case.

.t-script

sky only

clamp(1.375rem, 1.1rem + 1.3vw, 2.125rem)

Newsreader Italic 400, -0.005em

I said it out loud. If not now then when.

.t-script is for one confiding line under a headline in the sky world. Never body, never UI, never more than a sentence.

4.3 Tracking

Display sits at 600 and up with negative tracking, from -0.012em to -0.03em. That tight setting is what makes the headline and the mark look like the same brand. Tracked-out capitals are banned as a default, with two recorded exceptions:

Where	What may be tracked caps	Recorded
The magazine, inntwbrand.com	Section eyebrows, bylines, nav labels	2026-09-08
Origin, ifnotnowthenwhen.co	Newspaper furniture only: folio bar, section tabs, ledger keys, bylines. UI face, 600 to 700, +0.14em, 9 to 11 px	2026-09-09

A third instance, not recorded

The kit's own `GlobalFooter` sets its column headings in uppercase at `0.14em` and its links at `0.12em`, on every property. That is tracked caps outside both recorded exceptions. Either canon records it as a third exception, or the footer changes.

Do

- ✓ Give every primitive an explicit size. `.t-display` without one inherits body size and looks merely off.
- ✓ Load Archivo with `axes: ["width"]`.
- ✓ Set small sentences in sentence case.

Never

- ✗ Track display type out, or set tracked-caps eyebrows above headings.
- ✗ Go below `width 62`.
- ✗ Bundle Helvetica Neue.
- ✗ Use `.t-script` for more than one line, or outside the sky world.

5 Surface

The system is flat. There is no shadow token and no shadow anywhere in the kit. Objects are separated by hairlines and by space, and the only depth on any page is the light in the cobalt and sky worlds.

Element	Value	Note
Hairline	<code>1px solid var(--rule)</code>	Between sections, under the nav, around fields and quiet buttons, around prose images
Radius	<code>2px</code>	Buttons and fields only. Nothing is pill-shaped
Focus ring	<code>outline: 2px solid var(--focus); outline-offset: 3px</code>	Keyboard focus only, never on mouse click
Blockquote	<code>border-left: 2px solid var(--fg)</code>	The one heavier rule
Inverse band	<code>background: var(--inverse-ground)</code>	The black footer under every property
Field on cobalt	<code>rgba(255,255,255,0.08)</code> , border <code>0.32</code>	Focus raises the fill to <code>0.14</code> and the border to cream
Field on sky	<code>rgba(2,79,218,0.04)</code> , border <code>0.28</code>	Focus goes to white with a cobalt border

Do

- ✓ Separate with a hairline or with space.
- ✓ Keep the 2px radius on anything clickable.

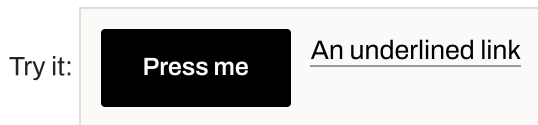

Never

- ✗ Add a drop shadow.
- ✗ Put the mark in a box, badge or keyline.
- ✗ Round a card.

6 Motion

Motion answers a click, nothing more. One easing curve, three durations.

Token	Value	What it does
<code>--ease-out</code>	<code>cubic-bezier(0.22, 0.61, 0.36, 1)</code>	The only curve. Every transition in the kit uses it
<code>--dur-fast</code>	140ms	Hover colour, link underline, field border, the button press
<code>--dur-base</code>	220ms	Larger state changes on Studios and the Project
<code>--dur-slow</code>	480ms	The Project's sky transitions only
Button press	<code>transform: translateY(1px)</code>	The only movement in the paper world
Link	Underline at 38% alpha, full on hover	The underline is the affordance. No arrows

Reduced motion. Under `prefers-reduced-motion: reduce`, every animation and transition drops to 0.001ms.

The logo animations (3, 8 and 9 second After Effects files, and a green variant) live in `INNTW Branding/Logos/Logo Animations/`. They are not part of the kit.

7 Voice

The words are governed by `INNTW-Brain/canon/04-voice.md` . What follows is the part a designer needs at the layout stage.

This version of you is temporary. You can become the person you always said you would be. This is how you do it.

The phrase is written "If not now then when". No comma. No question mark, ever. "If Not Now Then When" as a name; all caps only where the mark or a nameplate already is.

The brand names the moment; it does not ask. It speaks to one reader as "you", offers a choice, and never assigns an identity.

Never	Write
Start today.	This version of you is temporary.
Don't wait.	You said you would.
Take the leap!	Become the person you said you would be.
What are you waiting for?	I'm running out of time.
You are a dreamer.	You can be the person you always said you could be.
Join the movement	Join
Unlock your true self	The person you said you would be

7.1 Layout rules from the voice

Do

- ✓ Buttons say what happens, in sentence case.
- ✓ Let the underline be the link's affordance.
- ✓ State real urgency plainly: the one-day storefront, the fifty units, the real close date.
- ✓ Say less, and say it with weight.

Never

- ✗ Arrows appended to button text.
- ✗ Tracked-out all-caps eyebrows above headings.
- ✗ Numbering like 01 / 02 / 03 on things that are not a sequence.
- ✗ Meta strings joined with middle dots.
- ✗ Exclamation marks.
- ✗ A question put to the reader, in a headline or a form field.
- ✗ A count, number or clock used as pressure that is not literally true.

8 Tokens

`inntw-brand-kit/src/tokens.css` is the implementation. This page and its Markdown twin are the record. Install with `pnpm add "github:INNTW/inntw-brand-kit#main"` and import `@inntw/brand/tokens.css` once in the root layout. Bump the kit's version on every change, or consumers keep serving the old build.

```

:root {

8.1 Asset index

File	What it is
<code>assets/inntw-mark.svg</code>	The mark, <code>fill="currentColor"</code> . The source of truth
<code>assets/inntw-mark-black.svg</code>	<code>#000000</code> . Paper sites, print, the press pack
<code>assets/inntw-mark-white.svg</code>	<code>#ffffff</code> . On cobalt, black and photography
<code>assets/inntw-mark-cobalt.svg</code>	<code>#024fda</code> . On paper or white only
<code>assets/inntw-mark-brown.svg</code>	<code>#85431e</code> . On cream only
<code>src/mark-path.ts</code>	The same path as a string, for inline rendering
<code>src/components/Mark.tsx</code>	<code><Mark size decorative /></code> . Prefer it over the files on the web
<code>src/tokens.css</code>	The whole system
<code>src/og.tsx</code>	Open Graph cards in paper, cobalt and sky
<code>assets/fonts/archivo-*.woff</code>	Archivo 400 and 600, for OG images only
<code>brand/inntw-brand-guidelines.html</code>	This document
<code>brand/inntw-brand-guidelines.pdf</code>	This document, US Letter
<code>brand/inntw-brand-guidelines.md</code>	The facts alone, for Claude in any other repo
<code>INNTW Branding/Logos/Official Logo/</code>	The Illustrator master the mark is generated from
